2. Why do you think many trees cannot grow in desert areas?

Answer-

Many trees cannot grow in desert areas due to the scarcity of water. Desert environments typically have very low rainfall and high temperatures, which create harsh conditions for plant growth. Trees require a consistent supply of water to thrive, and the lack of moisture in desert regions makes it difficult for them to survive and grow. The soil in deserts is often sandy and lacks essential nutrients, further inhibiting tree growth.

3. Do you have any relatives who live in another country?

Answer-
