

NCERT Solutions for Class 10 English Footprints without Feet Chapter 5: There is only one prose lesson in NCERT Solutions for Class 10 English Footprints without Feet Chapter 5. It has been painstakingly produced by our faculty. Our panel of experts created the Class 10 NCERT Solutions to give students the most precise answers possible. The answers are provided in straightforward English to aid students in developing a thorough comprehension of this unit and to provide them with the confidence they need to confidently tackle every exam question and earn high marks.

Students can use the NCERT Solutions for Class 10 English Footprints without Feet, which are available in PDF format, if they are unsure of how to answer the problems. To gain fearless mastery of the subject, one can use NCERT Solutions while tackling the textbook questions. Regularly studying the chapters helps students develop their logical and analytical thinking skills, which are crucial for exams.

NCERT Solutions for Class 10 English Footprints without Feet Chapter 5 Overview

The novel Footprints without Feet tells the tale of Gryphon, an eccentric scientist who found a medication that could turn a person invisible. But rather than applying his theory to the benefit of society as a whole, he abused it and became an outlaw. When he was asked to vacate the property, he lit his landlord's house on fire. After that, he stole clothing from a shop and cash from a hotel clerk's desk that was intended for housekeeping.

Moreover, he fled the scene and was nowhere to be found when a constable attempted to arrest him for the annoyance he had produced. Hence, instead of employing the uncommon medication that rendered him invisible and alarmed everyone around him, this tale describes how a rogue scientist took advantage of it for his gain and the good of society as a whole.

NCERT Solutions for Class 10 English Footprints without Feet Chapter 5

1. How did the invisible man first become visible?

When two boys in the middle of London suddenly noticed Griffin's new, muddy mark, it was the first indication of his presence. They followed him till the muddy impressions got progressively dimmer until they disappeared entirely.

2. Why was he wandering the streets?

Gryphon was a lawless individual while being a brilliant scientist. He just took off his clothing to escape without being noticed after setting the property owner's house on fire. As a result, he ended up being a vagrant.

Read to Find Out

1. Why does Mrs Hall find the scientist eccentric?

Mrs. Hall found the scientist peculiar because he arrived at the inn during the winter and was dressed peculiarly. He told Mrs. Hall he didn't want to talk to her and that he would want to be left alone, responding coldly to her courteous remarks.

2. What curious episode occurs in the study?

Gryphon stole something from a minister's house. When they were both asleep, he looted it, and the noises coming from the study woke them up. They heard the sound of money being taken as they went downstairs, but despite searching behind the curtains, in the chimney, and beneath the desk, they were unable to locate anyone. Not only was the money gone, but there was no sign of the individual.

3. What other extraordinary things happen at the inn?

Ever since their initial meeting with Mrs. Hall, the scientist has been aloof. He was never bothered or interrupted by them. However, one day they saw that his door was open and thought it would be a good chance to sneak a peek. The scientist had been awake for some time, and the clothes on the bed were cold

. A sniff near her ear brought Mrs Hall's attention to the hat that had smacked against her face. That was followed by the chair coming to life and flying towards her. She hurried out of the room with her spouse, shutting the door behind them. They ran for their lives because they were afraid.

4. "Griffin was rather a lawless person." Comment.

Gryphon lacked integrity. He vanished into thin air and set his owner's house on fire. His owner wanted to kick him out and didn't like him, so he did that. By taking off his clothes and acting like a homeless vagrant, he easily got away with that. He committed thefts in a store and from the clergyman's residence. When the proprietor and Mrs. Hall entered his room, he also attacked them. Rather than using his invention to benefit others, he attempted to use it for his selfish ends.

5. How would you assess Griffin as a scientist?

As an Intelligent Scientist, Gryphon was. He figured out how to turn a human body invisible by ingesting some uncommon medications that turned his body into glass. However, he used it for

his gain and benefit rather than for the advancement of society. He did injure people, steal, and even set fire to his owner's house. He was a scientist who lacked ethics.

Talk About It

1. Would you like to become invisible? What advantages and disadvantages do you foresee if you did?

If it were feasible, I would prefer to disappear for a while. I was free to act however I pleased without fear of rejection or concern for my safety. It would be thrilling and enjoyable to wander. However, I won't have someone to keep me company, which will make me feel extremely alone.

2. Are there forces around us that are invisible, for example, magnetism? Are there aspects of the matter that are 'invisible' or not visible to the naked eye? What would the world be like if you could see such forces or such aspects of matter?

There are many different forces in our environment, such as electromagnetic waves and magnetic fields. These unseen forces assist us in carrying out the essential tasks of our daily lives. If we could see these forces, I think that would be completely ridiculous. I think it's better that they can't be seen.

3. What makes glass or water transparent (what is the scientific explanation for this)? Do you think it would be scientifically possible for a man to become invisible or transparent? (Keep in mind that writers of science fiction have often turned out to be prophetic in their imagination!)

Since water has free electrons, light can flow through it. We perceive no color and it is transparent because there is no reflection of light. Since the human body is made up of many intricate cells, and it is not nearly conceivable to make that enormous diversity of cells invisible, I do not believe that the human body can be transparent.

Benefits of NCERT Solutions for Class 10 English Footprints without Feet Chapter 5

Enables Time Efficiency

Students may readily comprehend the entire chapter by using the qualitative answers provided by the NCERT Solution for Footprints Without Feet for Class 10. Every student can access self-learning resources thanks to the way these solutions are structured. Students may simply manage their time, cut down on time-wasting, and win the game. Students do not need to consult a variety of study tools because the NCERT Solution Class, 10 English Footprints Without Feet, elaborates the literary meanings and significant elements of the chapter in a very thorough manner.

Critical Thinking is Developed

Several sections of the NCERT Solution of Footprints Without Feet For Class 10 are linked to the chapter. It includes pertinent questions that help students improve their literacy and critical thinking abilities.

Footprints Without Feet: NCERT Solution for Class 10 includes a significant section of questions that require students to articulate their ideas and apply their knowledge to understand the chapter. This improves their critical thinking skills and allows them to map their self-evaluation for better exam preparation.

Excellent teachers here prepare NCERT solutions for Class 10 English Footprints without Feet. These solutions include quality answers that are written by all C.B.S.E. regulations. The solutions offered are neatly arranged. Every unit of the exercise is covered in the format the solutions are presented in.

Without fail, the students will discover the answers to all of the questions. The NCERT answer for Class 10th English Footprints without Feet helps the students' preparation become organized and comprehensive. The scores will so rise significantly over what they were previously.
