Q8 Text Solution:

Key Concept:

- While catching the fast moving ball, fielder in the ground gradually pulls hand backwards with the moving ball to reduce the velocity of the ball.
- It is based on the **principle of second law of motion** that states that the rate of change of momentum is directly proportional to the force applied.

Explanation:

- According to the second law of motion, the rate of change of momentum is directly proportional to the force applied or exerted.
- As per the law, when the fast moving ball is caught by the fielder in the ground than he takes some more time by pulling his hand backwards due to which the

rate of change momentum decreases due to increase in time.

- This in turn decreases the exerted force/impact on the hands of fielder thus avoiding injuries when handling fast moving ball.

Hence, the answer is **option(B)** i.e '**Newton's second law of motion**'.
