NCERT Solutions for Class 6 Social Science Geography Important Questions Chapter-Wise

Below are important questions chapter-wise for Class 6 Social Science Geography along with brief answers:

Chapter 1: The Earth in the Solar System

1) What is the Solar System?

The Solar System is a system of celestial bodies that includes the Sun, planets, moons, asteroids, comets, and other objects.

2) Why is Earth called the Blue Planet?

Earth is called the Blue Planet because it appears blue from space due to the reflection and scattering of sunlight in the atmosphere.

3) Which is the closest planet to the Sun?

Mercury is the closest planet to the Sun.

Chapter 2: Globe: Latitudes and Longitudes

1) What is the significance of the Prime Meridian?

The Prime Meridian is the starting point for measuring longitudes. It passes through Greenwich, London, and serves as the reference point for determining time zones.

2) Why are latitudes and longitudes important in navigation?

Latitudes and longitudes help in locating places on the Earth's surface, aiding navigation and providing a precise way to determine a location's position.

Chapter 3: Motions of the Earth

1) Explain the difference between rotation and revolution.

Rotation is the Earth spinning on its axis, causing day and night. Revolution is the Earth's orbit around the Sun, leading to changes in seasons.

2) How do day and night occur?

Day and night occur due to the Earth's rotation. When a specific area faces the Sun, it experiences daylight, while the opposite side experiences nighttime.

Chapter 4: Maps
