Testimonials from previous batches of GETs

Satyabrata Bihari – RWE Renewables GmbH, Germany (3rd batch)

The training was extremely helpful to understand the basic power plant principles and concepts. Quality of the content was excellent. I really like the unique balance of theory and on-job training. I appreciate the wisdom, experience and personable presentation, which exceeded my expectations. The on-job training provided to us was very concrete and easy-to-follow tools for practical environment. I feel confident in applying this approach to different situations that came knocking throughout my journey. It provided me a good opportunity to grow my knowledge base and improve my job skills to become more effective in the workplace. It also helped me to reinforce my skills and acts as an impetus for improvement. Thank you so much for this valuable training. I really enjoyed it and encourage others to be part of it.

Ashutosh Ranjan, System Technologies – STEAG Energy Services India, Head Office, Noida (04th batch)

It's been 11 years that I have been working with STEAG after starting my career as a GET and it has proved to be a good experience for me. As a GET, I got a lot of exposure here and have been able to develop myself both 'personally and professionally'. Reason why I have been with the company is quality work, friendly work environment and immense learning opportunities. The opportunities and scope of development has polished my skills and helped me become a better resource.

Tuhina Banerjee – Asset Optimization – STEAG Energy Services, VL Jharsuguda site (14th batch)

I joined STEAG as a Graduate Engineer Trainee (GET) in 2021 and enrolled in their 1-year training and certification program on "Operation and Maintenance of Thermal Power Plants". The training was extremely helpful in understanding the basic principles and concepts of power plants. The quality of the content was excellent, offering a unique balance of theory and on-the-job training. This training provided an excellent opportunity to expand my knowledge base and enhance my job skills, making me more effective in the workplace. It reinforced my skills and acted as an impetus for continuous improvement.
