(NOTE: Operations should be performed on the whole numbers, without breaking down the numbers into their constituent digits. E.g. 13 – Operations on 13 such as adding/subtracting/multiplying to 13 can be performed. Breaking down 13 into 1 and 3 and then performing mathematical operations on 1 and 3 is not allowed.)

Ans  A. 53

B. 62

C. 59

D. 64

Q.73 When a drop of ink is placed in water, it spreads evenly without stirring. What does this demonstrate?

Ans  A. Particles are at rest

B. Particles are heavy and settle down

C. Particles of matter are constantly moving

D. Water reacts with ink

Q.74 Two sets of numbers are given below. In each set of numbers, a certain mathematical operation on the first number results in the second number. Similarly, certain mathematical operation on the second number results in the third number and so on. Which of the given options follows the same set of operations as in the given sets?

(NOTE – A two/three digit number cannot be broken into individual digits for operations e.g. if 37 is followed by 10, the operation cannot be  $3+7$  as a two digit number cannot be broken into individual digits)

42 - 45 - 270 - 265

25 - 28 - 168 - 163

Ans  A. 33 - 34 - 204 - 193

B. 28 - 39 - 156 - 153

C. 20 - 23 - 138 - 133

D. 12 - 23 - 46 - 37
